Founding chair of the Commission (2002-2012) and ex officio member of the current Steering Committee. In 2014, Tony and Frank Winde produced the official Assessment of Phase VII of the International Hydrological Programme for UNESCO, setting out proposals for the future. Tony was Director of the NATO Advanced Research Workshop on Natural Disasters and Water Security.

He has served on many scientific committees, including the World Meteorological Organisation (WMO) Commission for Hydrology and conferences sponsored by the International Association of Hydrological Sciences (IAHS), the International Union of Geodesy and Geophysics (IUGG), the World Water Council, and the World Council for Science (ICSU), as well as chairing the Groundwater Committee of the ICSU Geo-Unions Joint Science Programme and delivering its contribution to the UN International Year of Planet Earth.

Tony has served on the Steering Committees of several IGU Commissions and Study Groups since the early 1980s. He is author of the long-running texts *Global Hydrology* (1997, 2013) and *Water Sustainability* (2010, 2015), numerous peer-reviewed research papers, and has edited 9 books and 8 special editions of international scientific journals.
